SUMMARY

Full Stack Developer with 2 years of experience building web applications with TypeScript, React, Next.js and Node.js. I work end to end, from the front-end to APIs, databases and deployment, focusing on Clean Code, SOLID principles, software architecture best practices and scalable, maintainable applications.

SKILLS

- **Front-end:** JavaScript, TypeScript, React, Next.js (App Router), HTML5, CSS3, Tailwind CSS, Zustand, React Query, i18n, SEO, accessibility (a11y)
- **Back-end:** Node.js, Express, Fastify, REST APIs, Webhooks, PostgreSQL, Supabase, Prisma, Firebase, MongoDB, Redis, Swagger/OpenAPI
- **Testing and DevOps:** Vitest, Jest, React Testing Library, Cypress, GitHub Actions (CI/CD), Docker, Vercel, Sentry, Git
- **Methodologies:** Scrum, Kanban

EXPERIENCE

Full Stack Developer | GRM – Gestão Documental (document management) | Remote | Feb 2025 – Present

- Built and maintain hundreds of smart forms for a large company with nationwide operations, using JavaScript for validation, data formatting, business rules and REST API integrations.
- Built Node.js (Express) web services integrated through the document management platform's SDK and REST API, with CRUD operations, data validation and integration between forms and databases.
- Automated approval flows that used to run over email, migrating them to digital workflows with full traceability, from form submission to final document generation.
- Take part in client meetings to gather requirements and turn business needs into technical solutions.

Freelance Full Stack Developer | Remote | Oct 2024 – Present

OFF Confecções: e-commerce in production (offconfeccoes.com.br)

- Single-handedly built the e-commerce from scratch, including an admin dashboard (orders, products and finances), with Next.js, React, TypeScript and Supabase (PostgreSQL, Auth and RLS).
- Integrated Pix and credit card payments (Asaas) confirmed via webhooks, with idempotent checkout, concurrent stock control, rate limiting (Upstash Redis) and a cron job that cancels expired Pix orders and restocks items.
- Ensured quality with automated tests (Vitest), CI on GitHub Actions (lint, typecheck and tests) and error monitoring with Sentry. Also integrated shipping with Melhor Envio and handled SEO with JSON-LD and sitemap.

Borderless Coding

- Built the Trilhas course platform (React, TypeScript, React Query and Firebase), used by 400+ students, with authentication, admin dashboard and lesson progress tracking.
- Built the first version of the company website in Next.js, with PT/EN internationalization and SEO.

PROJECTS

- **FindAFriend: pet adoption platform** (find-a-friend-official.vercel.app): API in Node.js, Fastify and PostgreSQL with JWT authentication and Docker, front-end in React and TypeScript, unit and e2e tests (Cypress) and CI.
- **Ecofood: 2nd place at Contcode Hackathon** (team of 4): platform that tracks food expiration dates in supermarkets and restaurants and suggests reuse or donation. REST API in Python (Django REST Framework) with PostgreSQL and JWT authentication; front-end in React, TypeScript and Tailwind CSS.

EDUCATION

Interdisciplinary Bachelor's Degree in Science and Technology, Federal University of Bahia (UFBA), 2017–2021
